

Ultra Low Latency Market Data for Colocated Trading

» speed, power, functionality

Trade matching engines are the new exchange floors ...

Access and proximity to the exchange floor is no longer restricted to the privileged few. It is now possible to collocate your servers within the same data centers as the busiest exchanges in the world.

Speed is Critical ...

The best prices in the modern trading venue are only available for fleeting moments, and with ever tightening margins it is mission critical to see the best prices quickly in order to execute profitable trading strategies.

Introducing E² - Placing You at the heart of the market

You now have an opportunity to receive hardware accelerated market data through the new generation V-Tick feed from Essex Radez or through an Exegy Ticker Plant. Essex Radez offers direct access to all North American feeds and affordable collocation within the same data centers as the busiest exchanges in the world. Exegy offers the fastest hardware accelerated ticker plant and rich functionality. Together they are E².

Access E² at the data center where it makes sense. For example, focus your equity trading strategies at one of our New York area co-location facilities and your futures trading at our Chicago center, then interconnect the two using dedicated bandwidth over our private network. As vendor of record for all North American feeds, we work with you to make the process both affordable and painless.

You Choose the Access Method & API

Unlike many data and ticker-plant providers, we believe your requirements, not our product managers, should dictate how your applications receive data. For this reason, E² encompasses four propositions:

- **Exegy Ticker Plant**
Trading firms can contract for a complete Exegy Ticker Plant fed by market data from Essex Radez.
- **Exegy Virtual Ticker Plant**
Connect to a hosted Exegy Virtual Ticker Plant. Start at two connections and build up as needed. Market data is provided by Essex Radez.
- **Normalized Multicast Feed (NMF)**
Powered by Exegy, the Essex Radez V-Tick NMF offers a normalized feed with level one equities, derived data, and a top five consolidated order book from the US order book exchanges
- **Raw Direct Feed (RDF)**
RDF from Essex Radez provisions raw exchange data from the Essex Radez portfolio of direct feeds.

Less Hassle

The Essex Radez and Exegy alliance eliminates the need for your firm to directly connect with each exchange individually. Essex Radez is a fully recognized market data vendor, making it possible to hook up market data quickly and at a fraction of the cost of other solutions. Moreover, Essex Radez can provide you with execution links to virtually any venue and can customize a support plan to meet virtually any requirement.

Extreme Speed. Extreme Insight.

Essex Radez V-Tick

Location: colocate with Essex Radez at:

- Equinix, 350 East Cermak Chicago, IL
- CBOE, 400 S LaSalle St., Chicago, IL
- NASDAQ, 1400 Federal Blvd, Carteret, NJ
- Savvis, 300 Boulevard East, Weehawken, NJ
- Equinix, NY4, 755 Secaucus, Secaucus, NJ
- NYSE, Mahwah, New Jersey (*coming soon*)

Speed & Capacity – Normalized Feed: the NMF service delivers market data in a wire protocol. The level 2 service builds on a robust level 1 offering to furnish the top of book and top 5 prices for exchanges where such data is published.

Data Feeds: an ever-expanding set — for a current listing of available feeds please visit our website at: www.essexradez.com
